

Professional Ambulance Equipment

All You Need in an Emergency

WEINMANN Emergency – Your Supplier for Modular

Consistent system orientation

From ventilators and monitoring devices, accompanying portable systems, defibrillators, suction pumps and emergency cases to central gas facilities and more, we equip your ambulance with exactly what you need – in a complete package from a single source.

Our emergency products are modular, reliable and perfectly coordinated with each other. Thanks to their compatibility, they can be put together to fulfill your specific needs. Your equipment then includes only those components you need for your work.

All our products and matching wall mounts are crash-tested and fulfill the EN 1789 norm. They can be charged and operated with 12V or 100 – 240V.

Intensive care transport ventilation

ULM CASES

RESCUE-PACK

WEINMANN Emergency develops and markets diagnostic, therapeutic and life-saving devices based on high-quality technology. For several decades we have been helping professional users in emergency and patient transport services and disaster medicine to save human lives.

Perfectly coordinated from a single source

From WEINMANN Emergency you get the ambulance equipment that you really need. Thanks to our broad product range (e.g., ventilators and monitoring devices, compatible portable systems, defibrillators, suction pumps, transport containers, central gas facilities) you can fulfill your customers' individual needs to perfection.

Quality Service on your premises

Emergency medical services around the world count on the readiness of their equipment when a call comes in. If something goes wrong with a device, the quality of local service management is put to the test. To ensure that high-quality Weinmann technical service can be found anywhere, we work with our partners to set up local service structures, train their technicians and equip them to service our products.
